Student Name: Weser Ivan Garcia

Group: Puerto

Assigned Role: Tester

What did I contribute to the project?

Assisted Puerto in testing and debugging errors that I have encountered while using the MiniOS.

What features did I personally develop?

None

What problems did I encounter?

Understanding how the operation system works and errors I have received while trying to run the MiniOs.

How did I solve those problems?

By learning on the way and finding out how to remove the errors through trial and error.

What did I learn from this project?

Understanding of memory management of the operating system is crucial to learning the uses of each specific commands and that communication is very important

Evidence of my contribution:
