Student Name: Nathaniel Gene C. Puerto

Group: Puerto

Assigned Role: Coding/Leader

What did I contribute to the project?

Implement user login functionality in MiniOS

What features did I personally develop?

Added a login feature with user accounts for authentication.

What problems did I encounter?

Find hard to communication with other members on online

How did I solve those problems?

F2f meetings

What did I learn from this project?

Make sure you are able to communicate properly give instruction ahead of time

Evidence of my contribution:

```
